

CLAIMS

What is claimed is:

1. A recording medium, comprising:

at least one still picture;

at least one still picture group information for arranging the still pictures into a number of groups, the still picture group information including a first virtual deletion information corresponding to the one still picture for virtually deleting the still picture; and

at least one additional audio group information for arranging at least one additional audio data into a number of groups, the additional audio group information including second virtual deletion information for virtually deleting the additional audio parts,

wherein the one additional audio group information includes additional audio group general information containing a start position of an additional audio group.

2. The recording medium of claim 1, wherein, if at least one still picture is set to a virtual deletion state, the one still picture and a corresponding additional audio part is not to be reproduced.

3. The recording medium of claim 1, wherein, if at least one still picture is not set to a virtual deletion state and a corresponding additional audio is set to the virtual delete state, the additional audio part corresponding to the one still picture is not to be reproduced.
